

Research Services

EnviroCom Australia® undertakes research and technical data collection for a wide range of government and private sector clients. Methodologies are developed for each project to reflect the client's needs.

Technical data collection includes:

- Domestic mobile garbage bin audits (garbage, recycling and organic)
- Landfill and transfer station audits
- Site specific audits
- Materials recovery facility waste stream audits
- Commercial and industrial waste assessments
- Community attitude and knowledge surveys
- Inspection programs
- Desktop research
- Compliance auditing

All data is analysed and presented to the client in tabular and graphical report format. The information

gathered during the data collection phase of the project can be utilised in a variety of ways including:

- Development of targeted waste education programs
- Monitoring of waste education programs
- Waste stream composition analysis
- Planning for future waste management systems
- Contract compliance
- Baseline data development
- State government compliance requirements.

SERVICE AREAS

- Waste stream composition surveys
- Community surveys
- Data collection design
- Waste management plans
- Waste management research
